Noteworthy News

CyberPatient is heading to deep space! 🚀

CyberPatient is heading to deep space! Early this year, **we announced** our incredible partnership with the National Research Council of Canada Industrial Research Assistance Program (NRC IRAP) and the Canadian Space Agency (CSA) to develop technology to assist medical crews in maintaining their competencies during deep space travel. We finally got to show off at the Beyond Health Summit 2022.

The CyberPatient Center for Medical Education and Research officially opens its doors

The CyberPatient Center for Medical Education and Research officially opened its doors at Ghalib University in Herat, Afghanistan. A fruitful partnership between CanHealth International, IHI and Ghalib University has made this center a reality, providing **hundreds of students** with access to computers and high-speed internet to practice their knowledge and clinical skills in our virtual hospital.

Community of Partners!

At CyberPatient, we do not see the work we do as a job for a client or a project for an institution, student, or channel partner but rather as **work we do with you - together.** These partnerships have accelerated the impact and advances to healthcare education technology.

As we head into 2023, we know this community will grow even faster.

Summer School

Our passionate team hosted the second annual CyberPatient Summer School. This free annual event is guided by our in-house medical experts. **1000 students registered from 29 countries** across the globe. **254** nursing and medical students **qualified** by actively participating in **3 weeks** of clinical skills testing in multiple classes, gradually getting harder. Dedicated students worked through **8 rotations**, including **24 cases** numerous times to improve their results and level up.

974 Total number of attempts on all cases

It was truly magnificent to be able to be a part of this summer school. It was fun, challenging and at the same time, a true classroom that would teach you even more than your textbooks. The case would completely stick to your mind and won't get away. - Behnaz

That's a wrap for 2022!
Thank you for being part of our innovative and pioneering CyberPatient community. We look forward to creating even more spectacular results together in 2023!
